CONTENTS TO VOLUME 76

PART 1 14 JULY 1976

Axisymmetric laminar wake behind a slender body of revolution. FRANCIS R. HAMA and LEIGH F. PETERSON *page* 1

On the virtual-mass and damping coefficients for long waves in water of finite depth. F. URSELL 17

Note on the long-wave limit of the virtual-mass coefficient for a half-immersed circular cylinder heaving on water of finite depth. P. F. RHODES-ROBINSON 29

Axially symmetric turbulent boundary layers on cylinders: mean velocity profiles and wall pressure fluctuations. W. W. WILLMARTH, R. E. WINKEL, L. K. SHARMA and T. J. BOGAR 35

Nonlinear aspects of an internal gravity wave co-existing with an unstable mode associated with a Helmholtz velocity profile. R. H. J. GRIMSHAW 65

A relation between the radiation and scattering of surface waves by axisymmetric bodies. A. M. J. DAVIS 85

On the wall structure of the turbulent boundary layer. R. F. BLACKWELDER and R. E. KAPLAN 89

Rimming flow of liquid in a rotating horizontal cylinder. K. J. RUSCHAK and L. E. SCRIVEN 113

Large scales in the developing mixing layer. F. K. BROWAND and P. D. WEIDMAN 127

A note on static and dynamic calibration of constant-temperature hot-wire probes. H. H. BRUUN 145

Precursor shock waves at a slow–fast gas interface. A. M. ABD-EL-FATTAH, L. F. HENDERSON and A. LOZZI 157

Experiments on collisions between solitary waves. T. MAXWORTHY 177

Constitutive equations in suspension mechanics. Part 2. Approximate forms for a suspension of rigid particles affected by Brownian rotations. E. J. HINCH and L. G. LEAL 187

PART 2 28 JULY 1976

Quasi-steady flow of a rotating stratified fluid in a sphere. SUSAN FRIEDLANDER 209

The growth of gravity-capillary waves in a coupled shear flow. G. R. VALENZUELA 229

Damping of weakly nonlinear shallow-water waves. JOHN W. MILES 251

Internal wave reflexion from a sinusoidally corrugated surface. R. P. Mied and J. P. Dugan *page* 259

Couette flow for a gas with a discrete velocity distribution. Henri Cabannes 273

On the stability of the Stewartson layer. Kiyoshi Hashimoto 289

The impingement of underexpanded axisymmetric jets on wedges. P. J. Lamont and B. L. Hunt 307

Thermoconvective instabilities in a porous medium bounded by two concentric horizontal cylinders. Jean-Paul Caltagirone 337

A moving-wall boundary layer with reverse flow. J. B. Klemp and Andreas Acrivos 363

Velocity profiles and fence drag for a turbulent boundary layer along smooth and rough flat plates. K. G. Ranga Raju, J. Loeser and E. J. Plate 383

Nonlinear Ekman–Hartmann layers and the flow outside. S. S. Chawla 401

Review

Analysis of Turbulent Boundary Layers, by T. Cebeci and A. M. O. Smith 414

Part 3 11 August 1976

Viscous eddies near a 90° and a 45° corner in flow through a curved tube of triangular cross-section. W. M. Collins and S. C. R. Dennis 417

On the shape of a gas bubble in a viscous extensional flow. G. K. Youngren and A. Acrivos 433

Refraction and shielding of sound from a source in a jet. T. F. Balsa 443

On the cause and characteristic scales of meandering and braiding in rivers. Gary Parker 457

Convection due to internal heat sources. Morten Tveitereid and Enok Palm 481

Stress relaxation effect in elastico-viscous lubricants in gears and rollers. A. Harnoy 501

Pressure and force distributions on a sharp-nosed circular cylinder at large angles of inclination to a uniform subsonic stream. P. J. Lamont and B. L. Hunt 519

The modelling of large eddies in a two-dimensional shear layer. E. Acton 561

Condensation shocks in nozzle flows. P. A. Blythe and C. J. Shih 593

Review

The Structure of Turbulent Shear Flow, 2nd edition, by A. A. Townsend 622

PART 4 25 AUGUST 1976

The shape of free jets of water under gravity. E. O. TUCK *page* 625

The stability of a meniscus joining a vertical rod to a bath of liquid. E. PITTS 641

Rolling motion of a sphere on a plane boundary in oscillatory flow. C. SAMUEL MARTIN, M. PADMANABHAN and C. D. PONCE-CAMPOS 653

Shock attenuation by a single transverse slit. J. H. S. LEE, P. P. OSTROWSKI and J. H. T. WU 675

Some problems concerning the production of a linear shear flow using curved wire-gauze screens. I. P. CASTRO 689

The influence of vortex shedding on the generation of sound by convected turbulence. M. S. HOWE 711

Thermal convection with strongly temperature-dependent viscosity. JOHN R. BOOKER 741

Axisymmetric homogeneous turbulence: a comparison of direct spectral simulations with the direct-interaction approximation. U. SCHUMANN and J. R. HERRING 755

Migration of rigid spheres in a two-dimensional unidirectional shear flow of a second-order fluid. B. P. HO and L. G. LEAL 783

A moving fluid interface on a rough surface. L. M. HOCKING 801

Double boundary layers in standing interfacial waves. B. D. DORE 819

CORRIGENDUM 829

The Structure of Turbulent Shear Flow, 2nd edition, by A. A. Townsend, 622

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, DR H. K. MOFFATT

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge, Massachusetts* 02138, *U.S.A.*

PROF. S. H. DAVIS, *Department of Mechanics and Materials Science, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. W. C. GRIFFITH, *Mechanical and Aerospace Engineering, North Carolina State University, Raleigh, North Carolina* 27607, *U.S.A.*

PROF. M. J. LIGHTHILL, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, A-025, University of California, La Jolla, California* 92093, *U.S.A.*

PROF. J. R. A. PEARSON, *Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2AZ, England*

PROF. O. M. PHILLIPS, *Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. J. S. TURNER, *Research School of Earth Sciences, The Australian National University, P.O. Box* 4, *Canberra* 2600, *Australia*

ASSISTANT EDITORS

DR H. E. HUPPERT (*Cambridge*), DR M. E. MCINTYRE (*Cambridge*)

EDITORIAL ASSISTANT

MISS M. E. LUCKING (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts for the printer should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Fluid Mechanics*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in six volumes of four parts; twice monthly. Single parts cost £5.50 net (US $15.00 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 73–78, 1976, is £17.50 per volume (US $47.50 in the U.S.A. and Canada) for institutions; £10.00 (US $28.00) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue.

CONTENTS TO VOLUME 77

PART 1 9 SEPTEMBER 1976

A theory for wave-power absorption by oscillating bodies. D. V. EVANS *page* 1

Hydrodynamic interaction between gas bubbles in liquid. L. VAN WIJHGAARDEN 27

Bispectral measurements in turbulence. K. S. LII, M. ROSENBLATT and C. VAN ATTA 45

Experiments on the stability of liquid films adjacent to supersonic boundary layers. WILLIAM S. SARIC, ALI H. NAYFEH and SPYRIDON G. LEKOUDIS 63

Higher eigenstates in boundary-layer stability theory. D. CORNER, D. J. R. HOUSTON and M. A. S. ROSS 81

A numerical model of the air flow above water waves. P. R. GENT and P. A. TAYLOR 105

An approximate theory for incompressible viscous flow past two-dimensional bluff bodies in the intermediate Reynolds number regime $O(1) < Re < O(10^2)$. SHELDON WEINBAUM, MICHAEL S. KOLANSKY, MICHAEL J. GLUCKMAN and ROBERT PFEFFER 129

Roll-cell instabilities in rotating laminar and tubulent channel flows. DIETRICH K. LEZIUS and JAMES P. JOHNSTON 153

Mixed-region collapse in a stratified fluid. P. C. MANINS 177

Coupling of surface and internal gravity waves: a mode coupling model. KENNETH M. WATSON, BRUCE J. WEST and BRUCE I. COHEN 185

PART 2 24 SEPTEMBER 1976

On the variation and growth of wave-slope spectra in the capillary–gravity range with increasing wind. STEVEN R. LONG and NORDEN E. HUANG 209

Exact large amplitude capillary waves on sheets of fluid. WILLIAM KINNERSLEY 229

The Rayleigh problem for a wavy wall. P. N. SHANKAR and U. N. SINHA 243

Spectral analogy between temperature and velocity fluctuations in a turbulent boundary layer. L. FULACHIER and R. DUMAS 257

Resonant oscillations in closed tubes: the solution of Chester's equation. JAKOB KELLER 279

A note on the spreading rate and virtual origin of a plane turbulent jet. NIKOLAS E. KOTSOVINOS *page* 305

The mechanism of bubble detachment from a wall at zero and negative gravity. G. MALCOTSIS 313

Strong MHD helical turbulence and the nonlinear dynamo effect. A. POUQUET, U. FRISCH and J. LÉORAT 321

An experimental study of turbulent convective heat transfer from a flat plate. A. E. PERRY and P. H. HOFFMANN 355

Characteristics of a turbulent boundary layer with an external turbulent uniform shear flow. Q. A. AHMAD, R. E. LUXTON and R. A. ANTONIA 369

Stability of slowly diverging jet flow. D. G. CRIGHTON and M. GASTER 397

REVIEW

Collected Works of Theodore Von Kármán 414

PART 3 8 OCTOBER 1976

Giant waves. RONALD SMITH 417

On over-reflexion. D. J. ACHESON 433

Measurements with a pulsed-wire and a hot-wire anemometer in the highly turbulent wake of a normal flat plate. L. J. S. BRADBURY 473

The measurement of the spectra of highly turbulent flows by a randomly triggered pulsed-wire anemometer. M. GASTER and L. J. S. BRADBURY 499

The spatial viscous instability of axisymmetric jets. PHILIP J. MORRIS 511

Sedimentological and fluid-dynamic implications of the turbulent bursting phenomenon in geophysical flows. ROSCOE G. JACKSON 531

Some notes on unsteady lifting-line theory. TH. VAN HOLTEN 561

Selective withdrawal from a layered fluid. P. J. BRYANT and I. R. WOOD 581

The initial dispersion of contaminant in Poiseuille flow and the smoothing of the snout. P. C. CHATWIN 593

Adjustment under gravity in a rotating channel. A. E. GILL 603

REVIEW

Aerodynamics, by L. J. Clancy 622

PART 4 22 OCTOBER 1976

Separation from the surface of two equal spheres in Stokes flow. A. M. J. DAVIS, M. E. O'NEILL, J. M. DORREPAAL and K. B. RANGER *page* 625

Wind-induced turbulent heat and mass transfer over large bodies of water. C. Y. SHAW and Y. LEE 645

The moving contact line: the slip boundary condition. E. B. DUSSAN V. 665

On the spin-up and spin-down of a rotating fluid. Part 1. Extending the Wedemeyer model. PATRICK D. WEIDMAN 685

On the spin-up and spin-down of a rotating fluid. Part 2. Measurements and stability. PATRICK D. WEIDMAN 709

Flow around a thin body moving in shallow water. CHIANG C. MEI 737

Diffusion of passive-scalar and magnetic fields by helical turbulence. ROBERT H. KRAICHNAN 753

Baroclinic instability in an eccentric annulus. P. R. GENT and H. LEACH 769

On the diffusion of momentum and mass by internal gravity waves. PETER MÜLLER 789

On the separation of air flow over water waves. M. L. BANNER and W. K. MELVILLE 825

REVIEWS

Fluid Mechanics and Thermodynamics of our Environment, by S. Eskinazi 843

Stability of Reaction and Transport Processes, by M. M. Denn 844

PROF. J. R. A. PEARSON, *Department of Chemical Engineering and Chemical Technology, Imperial College, London SW7 2AZ, England*

PROF. O. M. PHILLIPS, *Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. J. S. TURNER, *Research School of Earth Sciences, The Australian National University, P.O. Box* 4, *Canberra* 2600, *Australia*

ASSISTANT EDITORS

DR H. E. HUPPERT (*Cambridge*), DR M. E. MCINTYRE (*Cambridge*)

EDITORIAL ASSISTANT

MISS M. E. LUCKING (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts for the printer should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Fluid Mechanics*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in six volumes of four parts; twice monthly. Single parts cost £5.50 net (US $15.00 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 73–78, 1976, is £17.50 per volume (US $47·50 in the U.S.A. and Canada) for institutions; £10.00 (US $28.00) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue.

CONTENTS TO VOLUME 78

PART 1 5 NOVEMBER 1976

Heat diffusion as a source of aerodynamic sound. A. J. KEMPTON *page* 1

The effective thermal conductivity of sheared suspensions. AVINOAM NIR and ANDREAS ACRIVOS 33

Unsteady evolution of a horizontal jet in a stratified fluid. R. PEYRET 49

Transient combined laminar free convection and radiation in a rectangular enclosure. D. W. LARSON and R. VISKANTA 65

The fluid mechanics of the semicircular canals. W. C. VAN BUSKIRK, R. G. WATTS and Y. K. LIU 87

Time-dependent laminar incompressible flow through a spherical cavity. N. V. GILLANI and W. M. SWANSON 99

Two-dimensional turbulence above topography. FRANCIS P. BRETHERTON and DALE B. HAIDVOGEL 129

Spatially decaying turbulence and its relation to mixing across density interfaces. E. J. HOPFINGER and J.-A. TOLY 155

The stress field of slender particles oriented by a non-Newtonian extensional flow. J. D. GODDARD 177

REVIEW

Notes sur les Ecoulements Rotationnels de Fluides Parfaits, by R. K. Zeytounian 207

PART 2 23 NOVEMBER 1976

A conservation law for internal gravity waves. MICHAEL MILDER 209

On spatially growing baroclinic waves in the ocean. NELSON G. HOGG 217

A derivation of equations for wave propagation in water of variable depth. A. E. GREEN and P. M. NAGHDI 237

Some effects of inclination on elastohydrodynamic squeeze film problems. D. WHICKER, A. L. BROWNE and S. M. ROHDE 247

Liquid-metal magnetohydrodynamics with strong magnetic fields: a report on Euromech 70. J. C. R. HUNT and R. MOREAU 261

Turbulent flow in a rectangular duct. A. MELLING and J. H. WHITELAW 289

Experiments on a viscous fluid flow between concentric rotating spheres. MANFRED WIMMER 317

Thermally, mechanically or externally driven flows in a gas centrifuge with insulated horizontal end plates. TAKUYA MATSUDA and KIYOSHI HASHIMOTO 337

Investigation of the stability of boundary layers by a finite-difference model of the Navier–Stokes equations. H. Fasel *page* 355

The lateral migration of a spherical particle in two-dimensional shear flows. P. Vasseur and R. G. Cox 385

The design of piezometer rings. K. A. Blake 415

Reviews

Selected Papers on Rheology, by M. Reiner 429

Coastal Engineering, by R. Silvester 431

Part 3 7 December 1976

Flow of vapour in a liquid enclosure. Milton S. Plesset and Andrea Prosperetti 433

The second approximation to mass transport in cnoidal waves. Michael de St Q. Isaacson 445

A stationary oblique breaking wave for laboratory testing of surfboards. H. G. Hornung and P. Killen 459

Motion of a bore over a sloping beach: an approximate analytical approach. P. L. Sachdev and V. S. Seshadri 481

Selective withdrawal from a finite rectangular tank. Jorg Imberger, Rory Thompson and Chris Fandry 489

Heat transfer from a hot film in reversing shear flow. T. J. Pedley 513

The mixing layer at high Reynolds number: large-structure dynamics and entrainment. Paul E. Dimotakis and Garry L. Brown 535

Fluctuating forces on a rigid circular cylinder in confined flow. A. Richter and E. Naudascher 561

Sizes and shapes of salt fingers near the marginal state. C. F. Chen and R. D. Sandford 601

Stokes flow past a slender body of revolution. James Geer 577

Spin-up from a rotating disk. S. S. Chawla 609

On the dynamics of finite-amplitude baroclinic waves as a function of supercriticality. Joseph Pedlosky 621

Reviews

Thermo-fluid Dynamic Theory of Two-phase Flow, by M. Ishii 638

Finite Elements in Fluids, edited by R. H. Gallagher, J. T. Oden, C. Taylor and O. C. Zienkiewicz 639

PART 4 22 DECEMBER 1976

Measurements of interacting turbulent shear layers in a duct. R. B. DEAN and P. BRADSHAW *page* 641

Longitudinal dispersion of a buoyant contaminant in a shallow channel. RONALD SMITH 677

A numerical simulation of the rarefied hypersonic flat-plate problem. D. I. PULLIN and J. K. HARVEY 689

On entry-flow effects in bifurcating, blocked or constricted tubes. F. T. SMITH 709

Axisymmetric flow of a viscous fluid near the vertex of a body. SHOICHI WAKIYA 737

On vertical boundary layers in a rapidly rotating gas. FRITZ H. BARK and TOR H. BARK 749

The occurrence of parametric instabilities in finite-amplitude internal gravity waves. RICHARD P. MIED 763

On a turbulent 'spot' in a laminar boundary layer. I. WYGNANSKI, M. SOKOLOV and D. FRIEDMAN 785

Nonlinear double-diffusive convection. HERBERT E. HUPPERT and DANIEL R. MOORE 821

REVIEWS

Fluid-Bed Heat Transfer, by J. S. M. Botterill 885

Dimensionsanalyse, by H. Görtler 857

FILM REVIEWS

Modes of Vibration, by L. J. Poldervaart, A. P. J. Wijnands, I. H. A. M. van Moll and E. J. van Voorthuisen 859

Sound Pulse–Boundary Layer Interaction Studies, by L. J. Poldervaart, A. P. J. Wijnands and I. Bronkhorst 859
